PROFESSIONAL SUMMARY

Dynamic Front-End Engineer with a solid foundation in web development and a commitment to creating innovative solutions since September 2021. Expertise in modern technologies, including JavaScript and React, paired with a full grasp of HTML and CSS and a grasp of UI/UX Design, drives the development of user-centric web applications. Known for optimizing performance and enhancing accessibility through responsive design, while maintaining project organization with version control systems. Passionate about continuous learning and collaboration, aiming to elevate user experiences and functionality in fast-paced environments.

WORK HISTORY

Front-End Engineer | 01/2025 to 03/2025

Clear View Clinics – Cairo

- Developed a secure, interactive web application with a modern front-end framework and an intuitive user interface
- Integrated third-party APIs to extend application functionality and deliver real-time features
- Worked with React to build dynamic, reusable components that improved development efficiency
- Collaborated with backend developers to ensure seamless API integration and data flow
- Successfully delivered the project within a tight deadline, demonstrating strong time management and problem-solving skills

---

Front-End Engineer | 06/2023 to 12/2023

Trust Pharma LTD – Cairo

- Designed and developed user-friendly web interfaces to enhance user experience and functionality
- Collaborated closely with designers to create seamless web applications using modern technologies
- Implemented responsive designs that improved accessibility and user engagement
- Optimized website performance, resulting in a significant reduction in load times
- Utilized version control systems to maintain project organization and facilitate teamwork
- Led initiatives to integrate new technologies that enhanced the application's capabilities
- Participated in code reviews to ensure adherence to best practices and standards

EDUCATION

Nile University | 2021-2025

Bachelor Science in Computer Science
Graduated with a 3.3 GPA through a rigorous undergraduate program focused on developing a strong foundation in computer science principles, programming, and software development. The curriculum covers core areas such as algorithms, data structures, databases, computer networks, artificial intelligence, and web technologies. Emphasizes practical problem-solving through hands-on projects, coding assignments, and collaborative teamwork. Prepares graduates for software engineering, data analysis, and IT systems development roles.

CERTIFICATES

IBM Professional Front End Developer (Mar 2025 – Apr 2025)
https://coursera.org/share/899f937de16ce48448f5f09d6d11bf1d

- Developing Front-End Apps with React
- Designing User Interfaces and Experiences (UI/UX)
- Introduction to Software Engineering
- Developing Websites and Front-Ends with Bootstrap
- Get Started with Cloud Native, DevOps, Agile, and NoSQL
- Intermediate Web and Front-End Development
- Introduction to HTML, CSS, & JavaScript
- Getting Started with Front-End and Web Development
- Getting Started with Git and GitHub
