Cairo, Egypt

PROFESSIONAL SUMMARY

Full-stack developer who designs and ships complete products end to end: database schema, access control, server logic and the React or Next.js front end. Works mainly in TypeScript with PostgreSQL and Supabase, building secure, installable PWAs with row-level security, audit trails, offline support and bilingual English/Arabic (RTL) interfaces. Delivers in small, reviewed vertical slices backed by unit, end-to-end and mutation tests, and runs production deployments.

CORE COMPETENCIES

Full-Stack TypeScript | React & Next.js | PostgreSQL & Supabase | Row-Level Security & RBAC | Database Schema Design | Progressive Web Apps | Automated Testing (Vitest, Playwright) | Bilingual / RTL UI

WORK EXPERIENCE

Streams Of Living Water

Aug 2025 - Present

Full-Stack Developer · Cairo, Egypt

- Architected and built a cross-platform ERP system (web, mobile, desktop) that digitizes and unifies the organization's core nonprofit operations
- Owned the system design end to end: clean architecture, database schema, role-based access control, and PostgreSQL row-level security (RLS)
- Built the core platform infrastructure: authentication, user management, permissions, and offline-first sync
- Designed data models and workflows for multi-role use by admins, coordinators, teachers, students and staff
- Integrated Supabase services (PostgreSQL, storage, email workflows) with the Flutter and React front ends
- Defined MVP scope, sprint backlog and the long-term technical roadmap from foundation to production scale

Clear View Clinics

Jan 2025 - May 2025

Full-Stack Developer · Cairo, Egypt

- Developed secure, interactive web applications for an ophthalmic surgery practice: services, patient information and appointment scheduling
- Built reusable React components that sped up development and kept the codebase maintainable
- Integrated third-party APIs for real-time features, working with backend developers to keep API contracts and data consistent
- Delivered SEO-optimized, mobile-first pages with custom form validation, on tight deadlines

Trust Pharma LTD

Jun 2023 - Dec 2023

Full-Stack Developer · Cairo, Egypt

- Designed and built responsive web interfaces for a pharmaceutical company, including a product catalog with search and filtering
- Translated UI/UX designs into production-ready React applications, working closely with designers
- Optimized front-end performance and significantly reduced page load times; took part in code reviews to enforce best practices

PROJECTS

WDC Operations Platform

Client work · NDA · 2026

Multi-phase internal operations platform for an agency (client intake, requests, admin, user-generated content, CRM and finance) that replaces a set of spreadsheets and Airtable bases. Every server mutation is covered by a mutation-testing harness, with a Playwright end-to-end suite. Shipped in reviewed vertical slices on a phased roadmap with plan gates; zero-downtime deploys via PM2 with a separate scheduler process.

Next.js · TypeScript · PostgreSQL · Drizzle ORM · Playwright · PM2

Till Financial Freedom

2026

Personal wealth tracker PWA (savings, spending, investments, loans, goals in EGP) with Face ID / passkey sign-in. All financial formulas live in a pure TypeScript calculation engine unit-tested with Vitest, and money is stored as integer piasters. Writes go only through server actions inside user-scoped transactions. Includes daily web-push reminders via Vercel Cron, auto-lock, and JSON/CSV backup and restore.

Next.js · TypeScript · PostgreSQL · Drizzle ORM · Supabase Auth · Tailwind CSS · Vitest

EDUCATION

BSc Computer Science (General Track) - Nile University, Sheikh Zayed — Jul 2025

GPA 3.24. Graduation project: ImmerseAI, a deep-learning web app for educational video summarization and visualization.

CERTIFICATIONS

Microsoft Back-End Developer Professional Certificate	Microsoft via Coursera	Apr 2026
IBM Front-End Developer Professional Certificate	IBM via Coursera	Apr 2025
IBM Generative AI (Introduction & Applications, Prompt Engineering, Software Development)	IBM via Coursera	2026

SKILLS

Languages: TypeScript, JavaScript, SQL, Python, C#, Dart, HTML, CSS

Front end: React, Next.js (App Router), Vite, Tailwind CSS, TanStack Query, Flutter, PWAs, RTL/bilingual UI

Back end: Node.js, Express, Next.js server actions, FastAPI, .NET, REST APIs, WebSockets

Data & auth: PostgreSQL, Supabase (Auth, RLS, Storage), Drizzle ORM, MongoDB, JWT, RBAC, passkeys

Testing & delivery: Vitest, Playwright, mutation testing, Git/GitHub, CI, Vercel, PM2 **Spoken:** Arabic (native), English (professional)
